Subject: Re: Account Security

Hello Team CISA!

Hope you are all well.

In our conversation a few weeks ago, you mentioned that your team could potentially help connect us with local election offices. Is this something you are still able to help with? Additionally, we can provide a training for them on account security best practices if you think that could be helpful.

And as always, if there is anything we can do to be helpful in the meantime, please let us know!

Thanks,

████████

Subject: Calendar Invite Updates - Monthly Meetings

Hi All, Thanks for the call yesterday – we'll follow-up shortly with some due-outs.

Logistically, we'll need the invite (which Meta manages) to be updated to a monthly meeting cadence and our pre-syncs to follow suit. Would you kindly send us updated invites and Kim Wyman (████████ @cisa.dhs.gov)? According to the cal, our next meeting would be April 13th; the pre-sync April 6th.

Let me know if you have any questions and thanks so much!

Hi Geoff, hope you are doing incredibly well.

Thanks so much for your outreach. It is excellent that you are staying on top of our announcements, and we appreciate your engagement. Rather than having election officials enroll in the pilot, we have an existing dedicated tool for certain external stakeholders.

We onboard state and local election officials onto Twitter's Partner Support Portal to flag concerns directly to Twitter. These concerns can include technical issues with their account and content on the platform that may violate our policies. In evaluating reports, Twitter makes its own independent decisions on whether the content violates the Twitter Rules and whether enforcement action is warranted.

We sent an announcement to all state and local election officials in September 2020 through the EI-ISAC, and work with NASS, NASED, and the Belfer Center, and election officials directly to inform them of this tool. They can email ████████@Twitter.com to enroll.

Hope this is helpful! Looking forward to connecting again soon!

Stacia

On Tue, Aug 17, 2021 at 3:32 PM Hale, Geoffrey <████████@cisa.dhs.gov> wrote:

Afternoon all,

I saw this announcement from Twitter Safety, in the 30 mins since it posted, several election officials asked if they could be part of the pilot. I thought I would propose it to you all that, as part of your election security efforts, verified election officials might be valuable testers for you all.

Twitter Safety on Twitter: "We're testing a feature for you to report Tweets that seem misleading – as you see them. Starting today, some people in the US, South Korea, and Australia will find the option to flag a Tweet as "It's misleading" after clicking on Report Tweet." / Twitter

Thank you for the consideration,

Geoff

Hey y'all - sorry for the slow response, have been on the road most of today.

Totally okay with recording for the initial preso, and sounds good to have that off for QA as I can be more candid :)

Looking forward to the chat tomorrow!

Thanks so much for sending, Sandy!

This looks great – the only thing I'd recommend adding is any steps for flagging or escalating MDM content, if possible. I think then that would make this a comprehensive product on both of the critical needs for officials –account security and MDM concerns. We discussed this a bit in our in-person meeting two weeks ago. Let me know if that's doable.

Subject: RE: Offerings for Election Officials

Hi ████, Thanks so much for reaching-out.

Meta was organizing the Industry-side to provide materials from each organization that listed existing programs for elections officials to enroll in for online security and organization specific best practices for protecting themselves or escalating online threats, especially as midterm season is underway. I think shorter is better here, so that they have an easy-to use resource.

The sooner we can receive this resource the better, since midterms are already underway.

Thanks so much and let me know if you have any additional questions!

Hi Lauren,

I'm not sure if we've met before, I'm on the campaigns and elections cybersecurity team at Microsoft and I run many of our elections-specific externally facing security programs for our Democracy Forward team.

████████████ reached out to me and mentioned that you were collecting information about the various services Microsoft and other tech companies have to offer election officials. I'm happy to provide that to you, but am hoping you'd be able to give just a few quick notes on the type of information you're looking for, the level of depth/format, intended audience, etc? That way I can tailor the information in a way that's most useful to you.

Thanks,

████████
